Overview:

The Coliseum C120P is the most compact active loudspeaker Yorkville Sound has to offer. This compact speaker is ideally suited for many applications including commercial installations, satellite extension speaker, home theatre, home stereo, reference monitor or personal stage monitor. The bass reflex enclosure with a tuned port and a 5-inch woofer that provides improved bass performance over conventional 5-inch woofer enclosures. Removing the press-fit grille gives access to the eyeball tweeter that can be swivelled to suit various listening positions.

The C120P will deliver 80 watts of continuous music with a frequency response of 75Hz to over 19kHz. Its amplifier section has easy to access volume, bass and treble controls, TRS balanced 1/4-inch inputs; 1/8-inch TRS stereo inputs are mounted on the rear panel. An innovative 1/8-inch TRS stereo link output is provided for true stereo operation when using two C120P's.

The C120P is shipped with a mounting U-bracket and all the necessary hardware for installation applications.
