- ▷ 1 x 1/4-inch Inputs / 1 x 1/4-inch Outputs
- ▷ Injection Molded, ABS Plastic Cabinet Construction
- ▷ Two-year Unconditional Warranty*

*Warranty valid in Canada and the United States only

Overview:

The C170P is a powered version of the C170, which is based on the already popular C110, C120 and C130, which have a complete list of features that make them an extremely good value for fixed installations. The C170P, is a compact 100 watt powered loudspeaker made from an ABS plastic enclosure with an 8-inch driver and 1-inch Mylar tweeter, and features 1/4" input and output connectors for maximum versatility.

The trapezoidal shape makes the C170P ideal for install or array mounting in tight locations. Shipped with a rugged U-bracket for wall or ceiling mounting, they are a very versatile and cost-effective solution where superior sonic quality is required for small installations, or as a repeater or fill cabinet in larger venues. An optional polemount adapter (C170ADAPT) is also available for applications where placing the C170P on a speaker stand is required.

Exclusive features to the C170P include a 1/4" input and auxiliary out, controls for Gain, Volume and Tone, with a switchable mic/line input sensitivity, and a power switch.

C170P Specifications:

Model	C170P
SYSTEM TYPE	2-Way
ACTIVE OR PASSIVE	Active
IMPEDANCE	N/A (Active)
SENSITIVITY (dB @ 1W / 1M)	N/A (Active)
PROGRAM POWER (watts)	100
