

Overview

This 2 x 15-inch / 1-inch, 1600 watt loudspeaker delivers amazing punch and extended low frequency response.

Ideal for use with or without a subwoofer, the E215's extended bottom end can easily cover many club applications on its own. The rotatable 80° x 50° horn means high frequency dispersion can be tailored to suit the cabinet's placement or application.

Integrated flypoints mean the E215 can be easily used in any install, touring or club rig.

The E215 is perfect for application in medium to large venues, especially when used with an optional EP215 processor and/or élite subwoofer for extended low frequency support.
