

NX18SP

18-INCH POWERED SUBWOOFER

Overview

NX loudspeakers have a history of traditional analog design and a reputation for road-tested reliability. The new NX18SP is the first 18" subwoofer in the series' two-decade tenure.

It was designed to be the perfect match for the latest generation of NX speakers. We suggest using one with a pair of NX8Ps, or two with a pair of NX12Ps for maximum sound reinforcement. As with all Yorkville Sound subwoofers, the NX18SP can be used to enhance any full-range system.

It features 2400 watts of peak output and three selectable voicing modes for rich, powerful bass in a compact, affordable enclosure.

NX speakers have been trusted on stages around the world for over 20 years, and the new NX18SP subwoofer is ready to inspire a new generation of performers.
