

# PS10P

10-INCH POWERED LOUDSPEAKER

## Overview

Designed for maximum versatility, the PS10P works equally well as a Front-of House cabinet, side fill cabinet or floor monitor. Innovative and highly efficient passive cooling scheme ensures the PS10P will operate in any environment without need of noisy internal dust collecting fans. Integrated reinforced flypoints ensure the PS10P can be flown quickly and easily in any fixed installation.

Integrated DSP ensures the PS10P can operate in any application without complex external processing. A simple one-button high pass filter switch rolls off low frequency material when PS10P is used with any Paralane Series or powered élite System subwoofer.
