

SA115S

1 x 15-INCH POWERED SUBWOOFER

Overview

The SA115S powered subwoofer is the companion piece to the SA102 full range speaker. Together, these components create a smaller, lighter and more portable Synergy Array system, without sacrificing the impressive bass Synergy is known for. The Tom Danley patented 15" tapped-horn design allows for the SA115S to deliver an astonishing 9000 watts (peak), and 4500 watts (program) in a compact cabinet.

Keeping versatility and ease of use as Synergy's key features, the SA115S has multiple stand adapters on the top and side surfaces, allowing the SA102 top boxes to be arrayed in multiple performance scenarios.
